JASKARAN SINGH MINHAS

Full-Stack Developer

+91 6284607938 • jaskaran1519@gmail.com • Portfolio • GitHub

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience shipping production-grade applications for fintech and AI clients. Proficient in React, Next.js, and Node.js, with expertise in AR integrations, real-time systems, and performance optimization across web and mobile platforms.

TECHNICAL SKILLS

Front-End: React.js, Next.js, TypeScript, Tailwind CSS, GSAP, Framer Motion, Three.js
Back-End: Node.js, Express.js, Next.js API Routes, FastAPI
Databases & Tools: MongoDB, PostgreSQL, Redis, Drizzle ORM, Firebase, Prisma, Docker, Git, Figma
APIs & Integrations: WebSocket, Razorpay, Google MediaPipe, Google Search API, OpenRouter API

WORK EXPERIENCE

Full-Stack Developer | Eazweb | Remote | Oct 2023 – Present

Rising Ahead | *Oct 2025 – Feb 2026*

- Deployed and customized 3 open-source platforms (Zammad, Discourse, Outline) for a banking dashboard, cutting reducing estimated setup time by ~60%.
- Built 2 React + FastAPI microservices integrated into an enterprise ecosystem, extending core functionality with zero downtime.

Buttercut AI | *Sept 2025 – Oct 2025*

- Redesigned the product UI across 10+ screens, improving visual consistency and reducing user-reported friction.
- Fixed subtitle-audio sync drift in the rendering pipeline, bringing playback accuracy to <50ms offset across all exports.

PROJECTS

Glasses AR Try-On | tryons.eazweb.com | *Next.js, Mediapipe, Three.js, Web Workers, TypeScript*

- Browser-based AR try-on using Mediapipe facial landmark detection and Three.js 3D rendering, running at 45 FPS with no native app install.
- Used Web Workers multithreading to offload vector math, keeping the main thread free and reducing frame drops by ~80%.
- Optimized Three.js render pipeline with dynamic resolution scaling for stable mobile performance across low-end devices.

Multi-Tenant SaaS E-Commerce Platform | *Next.js 15, PostgreSQL, Redis, Razorpay, TypeScript*

- Architected a Shopify alternative supporting 200+ currencies, with row-level tenant isolation and a Redis-cached domain engine delivering <1ms tenant lookups.
- Built a full Razorpay payment pipeline with AES-256-GCM encrypted keys and webhook-verified fulfillment, handling end-to-end order accuracy.
- Demo environment: multi-tenant-ecom.pages.dev — Admin login: user@demo.com / password123

Googuessy | googuessy.pages.dev | *Next.js, WebSocket, OpenRouter API, Google Search API*

- Real-time multiplayer game with WebSocket game rooms supporting concurrent players and synchronized state across all clients with <100ms latency.
- Integrated OpenRouter API for question generation and Google Search API to validate answers against live top-10 completions.
- Designed a live leaderboard synchronization system with optimistic UI updates for smoother multiplayer interaction.

EDUCATION

B.Tech | Punjab Engineering College (PEC), Chandigarh | 2019 – 2023
