

JASKARAN SINGH MINHAS

Full-Stack Developer

+91 6284607938 • jaskaran1519@gmail.com • [Portfolio](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience shipping production-grade applications for fintech and AI clients. Proficient in React, Next.js, and Node.js, with expertise in AR integrations, real-time systems, and performance optimization across web and mobile platforms.

TECHNICAL SKILLS

Front-End: React.js, Next.js, TypeScript, Tailwind CSS, GSAP, Framer Motion, Three.js

Back-End: Node.js, Express.js, Next.js API Routes, FastAPI

Databases & Tools: MongoDB, PostgreSQL, Redis, Drizzle ORM, Firebase, Prisma, Docker, Git, Figma

APIs & Integrations: WebSocket, Razorpay, Google MediaPipe, Google Search API, OpenRouter API

WORK EXPERIENCE

Full-Stack Developer | [Eazweb](#) | Remote | Oct 2023 – Present

[Rising Ahead](#) | Oct 2025 – Feb 2026

- Deployed and customized 3 open-source platforms (Zammad, Discourse, Outline) for a banking dashboard, cutting reducing estimated setup time by ~60%.
- Built 2 React + FastAPI microservices integrated into an enterprise ecosystem, extending core functionality with zero downtime.

[Buttercut AI](#) | Sept 2025 – Oct 2025

- Redesigned the product UI across 10+ screens, improving visual consistency and reducing user-reported friction.
- Fixed subtitle-audio sync drift in the rendering pipeline, bringing playback accuracy to <50ms offset across all exports.

PROJECTS

Glasses AR Try-On | [tryons.eazweb.in](#) | Next.js, Mediapipe, Three.js, Web Workers, TypeScript

- Browser-based AR try-on using Mediapipe facial landmark detection and Three.js 3D rendering, running at 45 FPS with no native app install.
- Used Web Workers multithreading to offload vector math, keeping the main thread free and reducing frame drops by ~80%.
- Optimized Three.js render pipeline with dynamic resolution scaling for stable mobile performance across low-end devices.

AI website builder/Framer alternative - | Next.js 15, Express.js, PostgreSQL, Redis, Anime.js, TypeScript

- Built a **Framer alternative** with more token efficient AI agent, optimized **AST node** structure.
- Integrated a full ecommerce setup with multiple payment provider, markets, currencies, web analytics and more.
- Used **Anime.js** as the animation engine for this app, with user friendly implementation.
- Currently in final stage of development. I can walk you through it if you want.

Googuessy | [googuessy.pages.dev](#) | Next.js, WebSocket, OpenRouter API, Google Search API

- Real-time multiplayer game with WebSocket game rooms supporting concurrent players and synchronized state across all clients with <100ms latency.
- Integrated OpenRouter API for question generation and Google Search API to validate answers against live top-10 completions.
- Designed a live leaderboard synchronization system with optimistic UI updates for smoother multiplayer interaction.

EDUCATION

B.Tech | Punjab Engineering College (PEC), Chandigarh | 2019 – 2023
