JASKARAN SINGH MINHAS

Full-Stack Web Developer

+91 6284607938 | jaskaran1519@gmail.com | Portfolio | GitHub

PROFESSIONAL SUMMARY

Full-Stack Web Developer with 2+ years of freelance experience building production-grade applications for clients in fintech and AI sectors. Proficient in React, Next.js, and Node.js with hands-on experience in AR integrations, real-time systems (WebSockets), and performance optimization. Proven ability to independently manage full project lifecycles from design through deployment.

TECHNICAL SKILLS

Front-End: React.js, Next.js, TypeScript, Tailwind CSS, GSAP, Framer Motion, Three.js

Back-End: Node.js, Express.js, Next.js API Routes, FastAPI

Databases & Tools: MongoDB, Firebase, Prisma, Docker, Git, Figma

APIs & Integrations: WebSockets, Google Mediapipe, Google Search API, OpenRouter API

WORK EXPERIENCE

Freelance Full-Stack Developer | Eazweb | Remote | Oct 2023 – Present

Rising Ahead — risingahead.com | Oct 2025 – Feb 2026

- Deployed and customized 3 open-source platforms (Zammad, Discourse, Outline) for a banking dashboard product.
- Built 2 React + FastAPI microservices integrated into an existing enterprise software ecosystem.

Buttercut AI — buttercut.ai | Sept 2025 – Oct 2025

- Redesigned the full product UI, improving usability and visual consistency across the application.
- Optimized the subtitle-audio synchronization pipeline, eliminating rendering lag and improving playback accuracy.

PROJECTS

Glasses AR Try-On | tryons.eazweb.com

Tech Stack: *Next.js, Google Mediapipe, Three.js, Web Workers, TypeScript, GSAP*

- Built a browser-based AR glasses try-on experience using Mediapipe facial landmark detection and Three.js 3D rendering.
- Applied vector math and Web Workers multi-threading to achieve enterprise-level accuracy at 45 FPS real-time rendering.

Googuessy — Multiplayer Google Feud | googuessy.pages.dev

Tech Stack: *Next.js, Express.js, WebSockets, OpenRouter API, Google Search API*

- Built a real-time multiplayer web game inspired by Google Feud, where players compete to guess popular Google search completions.
- Implemented WebSocket-based game rooms for synchronized, low-latency multiplayer sessions across concurrent users.
- Integrated OpenRouter API for dynamic question generation and Google Search API to fetch top 10 results for answer validation.

EDUCATION

B.Tech — Punjab Engineering College (PEC), Chandigarh | 2019 – 2023
